ABOUT

Backend PHP Developer with 4+ years of experience in designing, developing, and maintaining scalable, high-performance web applications. Strong expertise in PHP and Laravel, with hands-on experience in software architecture, RESTful APIs, third-party integrations, authentication, payment gateways, real-time technologies, and backend system design.

Experienced in MySQL database design, query optimization, performance tuning, and building maintainable backend solutions using clean architecture principles, MVC, and modular application structures. Skilled in WordPress development, including custom themes, plugins, ACF, WooCommerce, and multilingual solutions. Proficient in integrating external services such as Zoom, payment gateways, OAuth, JWT, Webhooks, and IPN systems. Experienced with Linux environments, deployment, debugging, Git workflows, and production server management.

Focused on writing clean, maintainable, and scalable code, solving complex backend challenges, and delivering reliable solutions in collaborative development environments.

EXPERIENCE

Backend Developer — 10/2024 – Present

10/2024 – Present
alex

El Noor Online

- Developed and maintained server-side logic using PHP frameworks (Laravel) and custom WordPress solutions.
- Designed, created, and optimized MySQL databases, ensuring data integrity and high performance.
- Built, integrated, and documented RESTful APIs to support seamless communication between services and applications.
- Customized and extended WordPress themes and plugins to deliver tailored solutions for business needs.
- Optimized application performance for speed, scalability, and reliability across different platforms.
- Collaborated with front-end teams to ensure smooth integration and deliver user-friendly experiences.

Backend Developer Part-time

01/2025 – Present

Four Software

- Developed backend functionality using PHP and Laravel for web-based systems.
- Built and integrated RESTful APIs for application and third-party service communication.
- Worked with MySQL databases, including database design, relationships, and query optimization.
- Implemented authentication, authorization, and backend business logic.
- Applied MVC and structured backend development practices to maintain scalable and maintainable applications.
- Debugged and optimized backend applications to improve performance and reliability.
- Collaborated with development teams to integrate backend services with frontend applications.

Backend Developer

04/2023 – 09/2024

Egensolve

- Engineered and maintained backend functionality using PHP for complex web applications.
- Designed and managed MySQL databases with a focus on scalability, data integrity, and optimized queries.
- Developed and integrated RESTful APIs to enable efficient communication between applications and services.
- Applied backend architecture concepts including MVC, service-based structures, and separation of concerns.

- Improved system performance through code optimization, caching strategies, and database tuning.
- Debugged backend issues and maintained clean, reusable, and maintainable code.
- Collaborated with front-end developers to deliver stable and consistent application experiences.

EDUCATION

Bachelor's Degree in Computer Science

2018 – 2022

Helwan University

GPA: 2.95 (Very Good)

Backend PHP

2024

Digital Egypt Pioneers Initiative DEPI

TECHNICAL SKILLS

Programming Languages

PHP, JavaScript, HTML, CSS

Backend Development

Laravel, PHP OOP, MVC Architecture, Authentication & Authorization, Role-Based Access Control

API Development & Integrations

RESTful APIs, Third-Party API Integration, Webhooks, IPN, OAuth 2.0, JWT Authentication

Deployment & Server Management

Linux, SSH, cPanel, Hostinger, Nginx, PHP-FPM, Composer, Laravel Artisan, Production Deployment

WordPress Development

WordPress, Custom Theme Development, Custom Plugin Development, Advanced Custom Fields (ACF), Custom Post Types, WooCommerce, WPML, Contact Form 7, WordPress Hooks & Filters

Database

MySQL, Database Design, Query Optimization, Relationships, Data Migration

Version Control

Git, GitHub, GitLab, Branch Management, Merge Conflict Resolution

PROJECTS

Alessra Education Platform – Learning Management System (LMS) Tech Stack: PHP (Laravel), MySQL, REST APIs, Zoom SDK/OAuth, WebSockets

- Developed and maintained backend modules for a full-featured educational LMS platform.
- Integrated Zoom Meetings using Zoom SDK and OAuth for teachers and students.
- Implemented live-session workflows and real-time communication using Laravel Reverb/WebSockets.
- Developed backend functionality for users, courses, trial sessions, live lessons, authentication, and notifications.
- Optimized database queries, APIs, and production performance.

Mr Shaco Store – E-commerce Platform Tech Stack: PHP (Laravel), MySQL, REST API, Payment Integrations

- Developed and maintained backend APIs for an e-commerce platform.
- Worked on products, orders, customers, inventory, payments, and administrative workflows.
- Integrated external payment services and implemented payment callback/IPN processing.
- Troubleshoot and optimized production APIs and database operations.

Sijil – SaaS Platform Tech Stack: PHP, MySQL, Authentication, Production Deployment

- Independently developed and launched a SaaS platform to production.
- Designed backend architecture, database models, authentication flows, and business logic.
- Managed debugging, deployment, maintenance, and performance optimization.
- Designed the application with scalability and maintainability in mind.

Rafeeq – Social / Delivery Platform Tech Stack: PHP (Laravel), MySQL, REST API

- Developed and maintained backend logic supporting delivery and service workflows.
- Built APIs and database operations required for communication between platform components.

Weddy – Event Services Marketplace Tech Stack: PHP (Laravel), MySQL, REST API

- Developed backend functionality for an event-services marketplace.
- Implemented vendor profiles, services, and related marketplace workflows.

Taxi Platform Tech Stack: PHP (Laravel), MySQL, REST API

- Developed backend services for ride requests, driver-rider matching, and tracking-related workflows.
- Designed APIs and database structures supporting taxi platform operations.

Payment Gateway Integrations Tech Stack: PHP, Laravel, REST APIs, Webhooks/IPN

- Integrated payment gateways including Payop and other external payment services.
- Implemented payment creation, callbacks, webhook/IPN processing, and transaction status synchronization.
- Worked with authentication tokens, API credentials, certificates, and multi-currency payment workflows.

WordPress Projects Developed and customized 20+ WordPress websites, including custom themes, ACF-based functionality, Custom Post Types, WooCommerce solutions, multilingual websites, forms, and business-specific features.
